At Tickstar, we're on a journey to help businesses and governments connect and interact more seamlessly through eDelivery of business documents. Founded in 2007 as a pioneering software provider, Tickstar has since evolved to become one of the leading providers of eDelivery services with customers in over 20 countries.

About : 104 words, 709 characters

At Tickstar, we're on a journey to help businesses and governments connect and interact more seamlessly through eDelivery of business documents. Founded in 2007 as a pioneering software provider, Tickstar has since evolved to become one of the leading providers of eDelivery services with customers in over 20 countries.

In 2021, Tickstar was acquired by Xero - a global cloud accounting software platform. Xero saw a beautiful connection between our purpose and their endeavour to help businesses thrive through better tools, information and connections. Together, we're reducing administrative burden and making it easier for businesses around the world to transact and exchange documents across borders.
